

Panda House At Al Khor Park, Qatar

The Panda House is a remarkable architectural structure that offers breathtaking views of the pandas from all angles. The interior boasts a coffee shop, a face painting center for children, and a panda-themed shop. This indoor habitat in Qatar was meticulously designed to replicate the natural surroundings found in China's dense forests of the mountainous Sichuan province. It is a great honor for Qatar to have become the first Middle Eastern country to host Chinese giant pandas, with Jing Jing and Si Hai's arrival on October 18, 2022, further strengthening the friendship between the two countries. To ensure that visitors have an unobstructed view of the pandas, laminated glass was selected for its post-breakage properties and exceptional clarity.

Lead designer: **DAR**

Main Contractor: **GET (Generic Engineering Technologies)**

Laminated Glass supplier: Technical Glass & Aluminium Co. L.L.C.
